

Frontend Interview Task (Second Stage)

Deadline: 5pm 9th Wednesday 2024.

Task Overview:

In this stage, you'll be focusing on two main aspects: design and functionality.

<https://www.figma.com/design/5WJzjEcyeJgBWucqcdkIE2/Untitled?node-id=0-1&t=bH9BPkn176onN9cV-1>

Note:

Please if by the deadline you are not done, still submit it as we will not be considering the completeness of the task but accessing your engineering knowledge. Also, implement the design first as this has the highest priority followed by the Add campaign function.

For storage: Create a repository class that will hold the data

1. Design Task:

- You are required to implement the design as provided in the Figma document.
- Specifically, focus on implementing the dashboard layout.
- Ensure the design follows responsive principles (for desktop and mobile).
- You can use the Ant UI Framework

2. Functionality Task - Add Campaign:

- Your second task is to implement the "Add Campaign" functionality.
- Create a functional form to add a new campaign, including fields like:
 - Campaign Name
 - Campaign Type
 - Campaign Description
 - Campaign Category: Entertainment, Movie, Games
- Upon form submission, display the new campaign data either in the list

3. Functionality Task - Search

- The search should be by the title alone

Note: Do not focus on any other functionalities

Submission should include a Git repo containing the project, and also be deployed to a React Deployment environment: e.g Netify or any other option you like.
